

## FolderExists

*(Information and examples taken from the DroidScript documentation)*

### Description

The **FolderExists** method checks if a folder exists in internal or external file storage.

```
exists = app.FolderExists( fileName );
```

See also [FileExists](#), [MakeFolder](#)

---

### Example

```
function OnStart()
{
    exists = app.FolderExists( "/sdcard/I0I0Script" );
    app.ShowPopup( exists );
}
```
