

GetPrivateFolder

(Information and examples taken from the DroidScript documentation)

Description

The **GetPrivateFolder** method gets the full path to a hidden folder on the devices internal storage, creating the folder if necessary. This folder will only be accessible from the App that created it.

```
fldr = app.GetPrivateFolder( name );
```

See also [MakeFolder](#)

Example

```
function OnStart()
{
    fldr = app.GetPrivateFolder( "MyStuff" );
    app.ShowPopup( fldr );
}
```
