

DroidScript wiki

(was AndroidScript) unofficial documentation by the community

DroidScript Bugs and Feature Requests

Note

This wiki is not really the ideal place to post bugs and feature request, as there is no reason to expect the DroidScript team to monitor this wiki.

We recommend communicating with them directly at [the official forum](#)

However, if you have informed the team of what you need, feel free to let the rest of the user-base know about what needs doing as well by posting here.

Links

Note for contributors

If you wish to create a new page in the **Bugs and Feature Requests** namespace, please create a link to the new page above, save this page and click on the link you just created.
