

## MakeFolder

*(Information and examples taken from the DroidScript documentation)*

### Description

The **MakeFolder** method creates a folder on the internal or external file storage. This method will create the complete folder path if necessary.

```
app.MakeFolder( path );
```

See also [FolderExists](#)

---

### Example

```
function OnStart()
{
    app.MakeFolder( "/sdcard/Temp/MyStuff" );
}
```
