

## HideProgress

*(Information and examples taken from the DroidScript documentation)*

### Description

The **HideProgress** method hides any previously shown popup progress window which was shown using the `app.ShowProgress` method.

```
app.HideProgress();
```

See also [ShowProgress](#)

---

### Example

```
function OnStart()
{
    app.ShowProgress( "Loading..." );
    setTimeout( "app.HideProgress()", 3000 );
}
```
